Flooding status in the Pittsburgh Seam - California, PA, Quadrangle

Legend:
- **mine drainage**
- **underground mining**
- **outlined mining**
- **Pittsburgh seam mining**

Flood status:
- not flooded or unknown
- flooded or ruined

This mapping is a reasonable, but not exact, facsimile of the distribution of underground mine areas. Mine map outlines were compiled from a variety of mine maps, surveys, and other sources. While the absolute accuracy of specific barrier locations, mine outlines, and outlined coal thickness may not easily be estimated, it may be considered to typically range from 30-100 meters. Mine features have been generalized, individual mines, mined areas, and pilings are not explicitly shown. Where possible, those mines that were mapped only if their total area was greater than 40 acres.
