Flooding status in the Pittsburgh Seam - Claysville, PA, Quadrangle

Legend:
- Blue: flooded
- Red: not flooded or unknown

This mapping is a reasonable, but not exact, facsimile of the distribution of underground mining areas. Mining map outlines were compiled from a variety of original and secondary sources of mapping records. While the absolute accuracy of specific marker locations, mine outlines, and unlined coal blocks may not easily be veriﬁed, it may be considered to typically range from 30-50 meters. Mine locations have been generalized. Individual mine, coal seam, and other names are not explicitly shown. Locations of those victims of mining were mapped only if their total area was greater than about 40 acres.
