Flooding status in the Pittsburgh Seam - Hackett, PA, Quadrangle

Legend:
- Monitoring point
- Water treatment plant
- Sealed shaft
- Pittsburgh coal seams

Flood status:
- not flooded or unknown
- Active
- Roofed or flooding

This mapping is a reasonable, but not exact, facsimile of the distribution of underground mine areas. Mine map outlines were compiled from a variety of original and secondary sources of varying accuracy. While the absolute accuracy of specific binder locations, mine outlines, and flood occurrences is not possible, the map is intended to approximate the true extents of the flooded areas. The map is useful for general planning purposes. Unlined coal bodies within mines were mapped only if their total area was greater than about 50 acres.
