Flooding status in the Pittsburgh Seam - Mannington, WV, Quadrangle

Legend:
- Drinking point
- Water treatment plant
- Subway
- Dam
- Road
- Coal mining

Flood status:
- Not flooded or unknown
- Flooded

This mapping is a reasonable, but not exact, facsimile of the distribution of underground mined areas. Mine map outlines were compiled from a variety of original and secondary sources of varying accuracy and precision. However, the exact extent and location of underground mining are not necessarily portrayed. Underlying topography, and unmined coal blocks may not easily be estimated. It may be considered to typically range from 30-100 meters. Mine features have been generalized, individual names, township, range and sections are not specified herein. Unmined coal blocks within mines were mapped only if their total area was greater than about 40 acres.
