Flooding status in the Pittsburgh Seam - Osage, WV-PA, Quadrangle

Legend:
- Coal seam
- Working area
- Pump
- Water treatment plant
- Shaft
- Roadway
- Pittsburgh coal seam

Flood status:
- Not flooded or unknown
- Active mine
- Flooded or flooding

This mapping is a reasonable, but not exact, facsimile of the distribution of underground mine areas. Mine map symbols were compiled from a variety of original and secondary sources of varying accuracy. The absolute accuracy of specific barrier locations, mine outlines, and mine names may not be guaranteed. Mapped mine areas are estimated to typically range from 30-150 acres. Mine features have been generalized, individual names, mapped peers, and prices are not necessarily exact. Unlined coal fields within mines were mapped only if their total area was greater than about 40 acres.
