Flooding status in the Pittsburgh Seam - Powhatan Point, WV-OH, Quadrangle

Legend:

- Water treatment plant

Colored areas are underground mining, indicated as gray within flooded areas (shaded areas), except that the area between the yellow-lined areas and the red-lined areas are gray. Flooded areas within these segments and the unlined coal blocks may not easily be estimated. It may be considered to typically range from 20-80 meters. Mine features have been generalized. Individual mine, longwall panels, and allers are not specifically shown. Unlined coal blocks within mines were mapped only if their total area was greater than about 40 acres.
