Flooding status in the Pittsburgh Seam - Tiltonsville, WV-OH, Quadrangle

Legend:
- S: sealed shaft
- Pittsburgh coal seam

Colored areas are underground mining indicated on supporting maps. Colored areas are not actual areas including pillars and barriers, except for those in the lower left and the central part of the map.

Legend:
- Sealed or unknown
- Flooded or flooding

This mapping is a reasonably, but not exact, facsimile of the distribution of underground mining areas. Mining studies were obtained from a variety of original and secondary sources of varying accuracy. While the absolute accuracy of specific mine locations, mine outlines, and unaffected coal blocks may not easily be verified, it may be considered to typically range from 30-50 meters. Minor features have been generalized. Individual mines, townspans, and pillars are not explicitly shown. Unclassified areas within mines was mapped only if their total area was greater than about 40 acres.
