Flooding status in the Pittsburgh Seam - Wind Ridge, PA, Quadrangle

Legend:
- Colored areas are underground mining indicated or thought to have flooded.
- Colored areas that are not flooded are unknown.
- Flooding status:
  - not flooded or unknown
  - likely flooded

This mapping is a reasonable but not exact, facsimile of the distribution of underground mining areas. Mine map outlines were compiled from a variety of original and secondary sources of varying accuracy. While the absolute accuracy of specific barrier locations, mine outlines, and unmapped coal blocks may not easily be estimated, it may be considered to extend a range from 5 to 10 percent. Mine failures have been generalized; specific mine locations are not necessarily depicted. Unmapped coal blocks within mines were mapped only if their total area was greater than about 40 acres.
