Flooding status in the Pittsburgh Seam - Wolf Summit, WV, Quadrangle

Legend:
- Monitoring point
- Shaft
- Flooded or flooding
- Not flooded or unknown

Flood status
- Not flooded or unknown
- Flooded or flooding

This mapping is a reasonable, but not exact, facsimile of the distribution of underground mine areas. Mine map symbols were simplified from a variety of original and secondary sources of varying accuracy. While the absolute accuracy of specific barrier locations, mine openings, and other mine-related features is unknown, the actual locations have been translated to typically range from 30-150 meters. Mine barriers have been generated, individual names, township, and other are not completely exact. Unlined coal workings within mines were mapped only if their total area was greater than about 40 acres.
