Plate 12
Mine Outlines in the Pittsburgh Coal
Study Area 1
(Revised March 2003)

The colored polygons represent mined areas, compiled from a variety of original and secondary sources. This mapping is a reasonable, but not exact, facsimile of the actual distribution of underground mined areas. The accuracy of the mapping is limited by the availability of data at the time of this project. No claim is made that the scale of this map is appropriate to enlarge and present these outlines at larger scales. Locations of blocks of mined coal within the mines are not delineated.
